

Why Quaver Health?

Meets All Standards

Our 196 lessons are aligned to the K-5 Health and PE TEKS! With our digital curriculum, we can update our lessons quickly and easily so the content remains current.

Authentic Resources

Our online curriculum was designed with input from medical doctors and nurses, PE teachers, school nurses, nutritionists, mental health professionals, and other qualified health practitioners. Our lessons are age and developmentally appropriate, taking into account children's physical, mental, and social and emotional growth over time.

Easy To Use

The Quaver online platform is very easy to learn and use. Our Lesson Guide provides three ways to view and instruct lessons: Lesson View, Daily Dose, and Health + PE. These instructional variations help create effective experiences specific to PE teachers, classroom teachers, or school nurses, counselors, or health educators. All lesson plans are online and include teacher notes to guide you through each activity.

Rich in Functionality

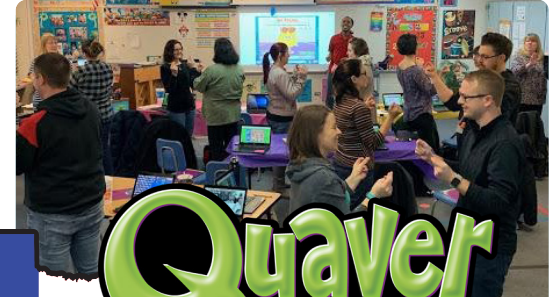

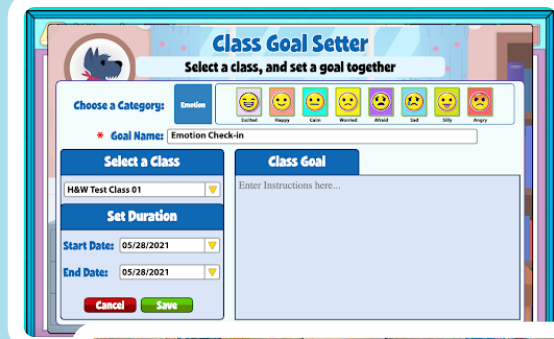

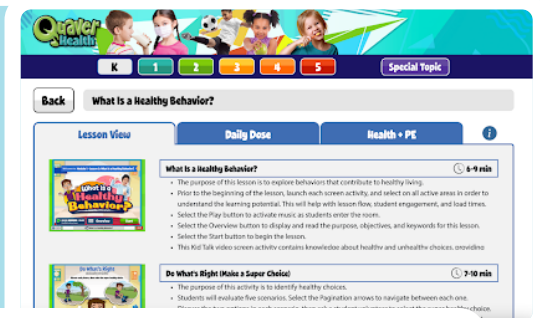

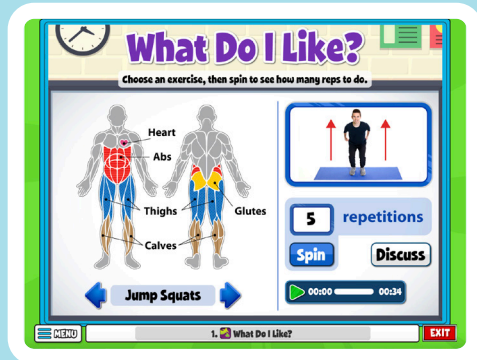

With unlimited student accounts, QuaverHealth extends the learning beyond the classroom by providing all of the functionality required, including progress monitoring. A searchable Resource Manager allows educators to modify curriculum, or our customizable Health Tracker tool allows teachers to create or edit grade-appropriate assessments. Quaver also offers Single Sign On and Roster Integration.

Proactive School and Teacher Support

QuaverEd not only provides the curriculum and resources, but all of the support you need! Backed by our interfacing technology, teacher training, live customer support, blogs, webinars, and PLCs, QuaverHealth is being delivered to best suit your needs.

Thank you for your interest in QuaverHealth!

If you have additional questions, please email us at info@quavered.com or call our Customer Service team at (866) 917-3633 (Mon.-Fri., 8 a.m. – 7 p.m. ET).
